

Annual Report 2023-24

Creating a recycling scheme
to keep Victoria beautiful

We acknowledge and respect Victorian Traditional Owners as the original custodians of Victoria's land and waters, their unique ability to care for Country and deep spiritual connection to it.

We honour Elders past and present whose knowledge and wisdom has ensured the continuation of culture and traditional practices.

donated to charities,
community groups
and schools

564
refund points
created

90%
of Victorians
aware of CDS Vic
in its first 5 months

...now that's a lot of change!

Introduction

Welcome to VicReturn’s inaugural annual report. As the Scheme Coordinator for Victoria’s Container Deposit Scheme (CDS Vic or the Scheme), we’re very proud of what we’ve achieved in our first eight months of operation.

CDS Vic is the fastest-growing, most convenient and accessible container deposit scheme in Australia. The success of CDS Vic is the result of shared commitment and dedication from our people, partners, industry and community stakeholders, along with the enthusiastic ‘buy-in’ from so many Victorians.

The Victorian Scheme has a unique structure, with the state divided into three distinct zones. Each zone is operated by an experienced network operator: Visy in the north, Return-It in the east and TOMRA Cleanaway in the west. This structure enables maximum accessibility and convenience and ensured a successful launch with hundreds of refund points being ready.

As Scheme Coordinator, our work represents an important step to transforming Victoria’s waste and recycling system, contributing to a circular economy as well as adding social and economic value to communities.

In its first eight months, the Scheme returned more than \$62 million to Victorians – which is a lot of change –

and created more than 500 jobs. With cost-of-living challenges affecting many, the timely launch of the Scheme has been welcomed by individuals, charities, community groups and schools whose stories are featured throughout this report.

The environmental purpose of the Scheme is to keep recyclable drink containers out of landfill, protect our waterways and reduce litter. In 2023-24, we helped save just over 1 billion containers from landfill.

Victorians use around 3 billion drink containers every year. We are working to ensure that as many as possible are diverted from landfill, recycled into new products and that the multiple benefits go back to the community. We may be new, but as the findings in this report show, the Scheme we oversee is already making a big impact – environmentally, economically and socially. We are committed to working with our partners to ensure that CDS Vic goes from strength to strength over the next 12 months and the years ahead.

Students from Heskett Primary School

2. About VicReturn

Staff from Horsham Depot operated by Axis Worx

About

VicReturn is a not-for-profit organisation formed by Lion, Coca-Cola Europacific Partners and Asahi Beverages.

VicReturn is responsible for coordinating the Scheme, its financial performance, operations, managing the scheme's IT systems, undertaking audits to ensure a high-quality public experience, managing the risk of fraud, promoting the scheme, and educating the community on the benefits of participating.

Along with board members from our three founding companies, we have an independent Chair, one Director representing the interests of small beverage suppliers, and one independent Director with a background in the waste and recycling industry. Lion, Coca-Cola Europacific Partners and Asahi Beverages have extensive experience managing container deposit schemes in Australia, with one or more of the companies involved in every Australian jurisdiction with a container deposit scheme.

Our mission

VicReturn seeks to make Victoria a leader in beverage container recycling, reducing the amount of beverage containers in litter and landfill, whilst adding value to our local communities, businesses and the environment.

Our values

Sustainability

We believe that a circular economy can truly transform Victoria's environment. Through recycling drink containers, we can secure a cleaner ecosystem.

Collaboration

We value the importance of partnerships to achieve the best social, environmental, and commercial results for all.

Impact

We care about what we do and work with purpose and integrity. We're driven by the opportunity to create positive change for all Victorians.

3. Chair's message

The first year of Victoria's Container Deposit Scheme has seen great success with Victorians taking the scheme well beyond what had been envisioned.

Victoria's Container Deposit Scheme (CDS) commenced operation on 1 November 2023.

It has been exciting to watch Victorians, from households to Councils and Material Recovery Facilities get behind Victoria's CDS.

The Scheme has had unprecedented rapid growth in its first 8 months with over 1 billion containers collected and recycled. This rapid growth directly benefits Victoria's environment with a noticeable decline in rubbish in our parks, natural habitats and waterways.

Victoria's Container Deposit Scheme has also been highly beneficial for the community. Multiple small sporting clubs, schools and charities are getting behind the CDS adding to their sense of community action and assisting with their running costs through container deposit funding.

By the end of the first year nearly \$63 million had gone into the pockets of households, sporting clubs and charities.

As the Victorian Scheme co-ordinator, VicReturn works closely with the Victorian Government and the three Network Zone Operators TOMRA Cleanaway, Visy and Return-It to ensure that the Scheme is run well and free of fraud and inefficiencies.

Our success to date would not have been possible without the Victorian Government's investment and vision and I thank Minister Dimopoulos and Recycling Victoria for their role in establishing the Scheme.

I am also grateful to our three Network Operators, for the work they have done managing refund points and ensuring returned containers are recycled within their dedicated zone area.

I would like to thank my Board who are made up of the original founding members Lion, Coca-Cola Europacific Partners and Asahi Beverages, as well as the Independent Brewers Association and an independent recycling specialist Member. Together their wealth of knowledge regarding container deposit schemes, the recycling and waste sector and the beverage sector more broadly have made my role as Chair of this new organisation significantly easier to navigate. I greatly appreciate my Board's strong motivation to ensure VicReturn is appropriately governed and guided with the right strategic vision and oversight.

In our first year of operation, in addition to overseeing a scheme with the most rapid growth in container returns in the country, we have undertaken numerous governance steps to ensure that both VicReturn and the Scheme as a whole, are being run well.

This includes establishment of our strategy and implementation plan, risk framework and appetite as well as establishing key partnerships. As part of ensuring good scheme management VicReturn has signed up over 4,100 Donation Partners, more than 646 number of First Suppliers (beverage container providers) and undertaken 474 Audits.

I congratulate our CEO Jim Round for the work he has done leading scheme mobilisation and his team for their important work in growing and further developing scheme operations.

As we continue our journey towards container return, reuse and recycling being part of everyday life for Victorians, I look forward to realising this vision with the VicReturn Board and team as well as our valued partners and stakeholders.

Yours sincerely,

Freya Marsden
Chair

4. CEO's message

Victoria's Container Deposit Scheme is off to a great start and is growing quickly. As I reflect on the first 8 months of the scheme's operation, I am filled with pride for what has been accomplished so far.

This year has been about laying a strong foundation. We have invested in our people and systems, adapted to delivery challenges, and developed relationships with our network operators, our first suppliers and Victorian communities.

It is a privilege to deliver a scheme that has real impact across the state. We have seen charities, schools and community organisations make best use of container returns to fundraise for causes and projects that they care about, turning waste streams into real life outcomes.

From day one, we set ambitious goals for growth, awareness and community engagement and it is gratifying to see those plans come to fruition. A billion drink containers have been returned in the first 8 months of the Scheme through network operators and Material Recovery Facilities and \$628 million has been returned to Victorians. But this program is about more than 10 cent refunds. It is a chance for new opportunities, with more than 597 jobs created so far across the state.

The Scheme continues to grow - keeping litter out of parks, waterways and off our streets, delivering better recycling outcomes for Victoria.

I would like to thank Minister Dimopoulos and Recycling Victoria for their vision and support and our partners, Visy in the north, TOMRA Cleanaway in the west and Return-It in the east for working so collaboratively.

And I must thank Lion, Coca-Cola Europacific Partners and Asahi Beverages for their investment in setting up VicReturn and for their strong support during mobilisation in particular.

I would also like to thank our Board Chair, Freya Marsden, who has been highly supportive and, amongst other things, focused on ensuring that VicReturn's governance is best practice and our inaugural Chair, Paul Klymenko, who provided much-needed support and expertise during mobilisation.

And lastly, I would like to acknowledge the hard work of the VicReturn team who have done a fantastic job and continue to help deliver an excellent container deposit scheme.

I look forward to continuing our work to grow the Scheme.

Yours sincerely,

Jim Round
Chief Executive Officer

5. How the Scheme works

Bayswater Depot

CDS Vic is an easy and convenient way for people to return their eligible drink cans, bottles and cartons at refund points across Victoria and get a 10-cent refund for each container.

The Scheme gives containers a new life by transforming them into new streams of material for recycling – meaning containers can be turned into new drink containers, as well as other

useful products. Consumers can either keep their refund or support their favourite charity, school or community organisation with a donation.

Scheme objectives

Increase recycling and reduce litter, cleaning up our environment.

Be convenient and accessible with many types and locations of refund points across Victoria.

Create new jobs and economic opportunities for individuals, charities and community groups.

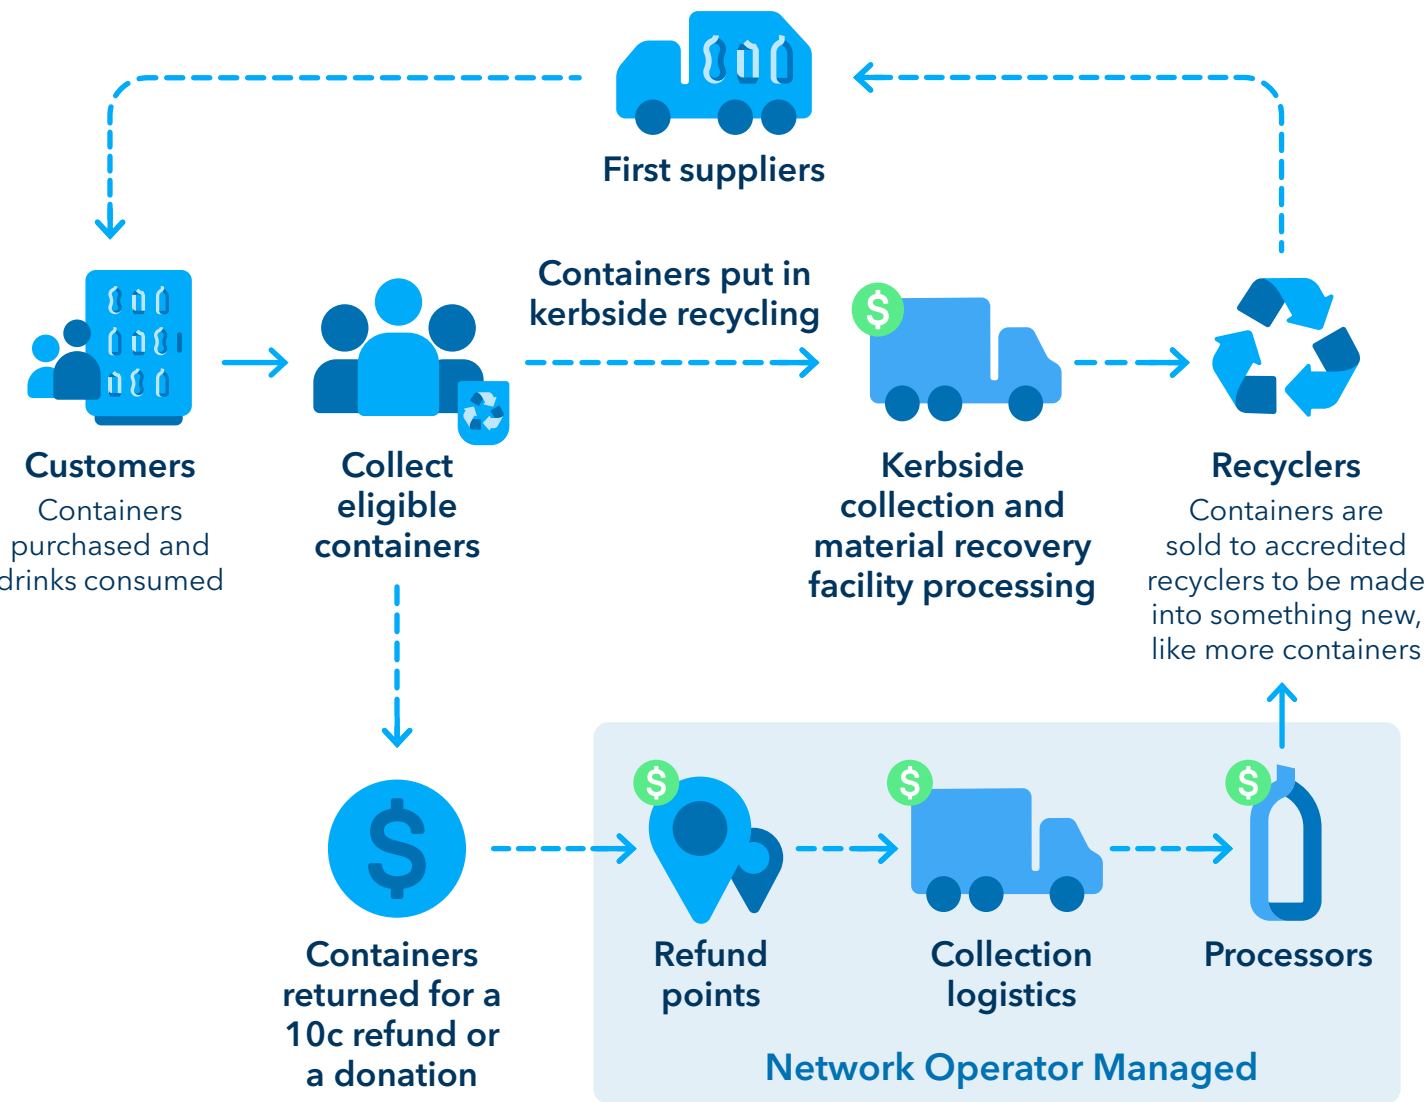

Ensure First Suppliers of beverage products take product stewardship responsibility.

Complement existing collection and recycling activities for recyclable waste.

How it works

A partnership model

The Scheme operates on a partnership model, where VicReturn coordinates the Scheme, handling financial operations, marketing and community education and maintaining scheme integrity. Our partners, the network operators Visy, Return-It, and

TOMRA Cleanaway, oversee the refund points, refunds to customers and ensure proper recycling of the containers. Recycling Victoria regulates the Scheme to ensure efficient operation.

Recycling Victoria

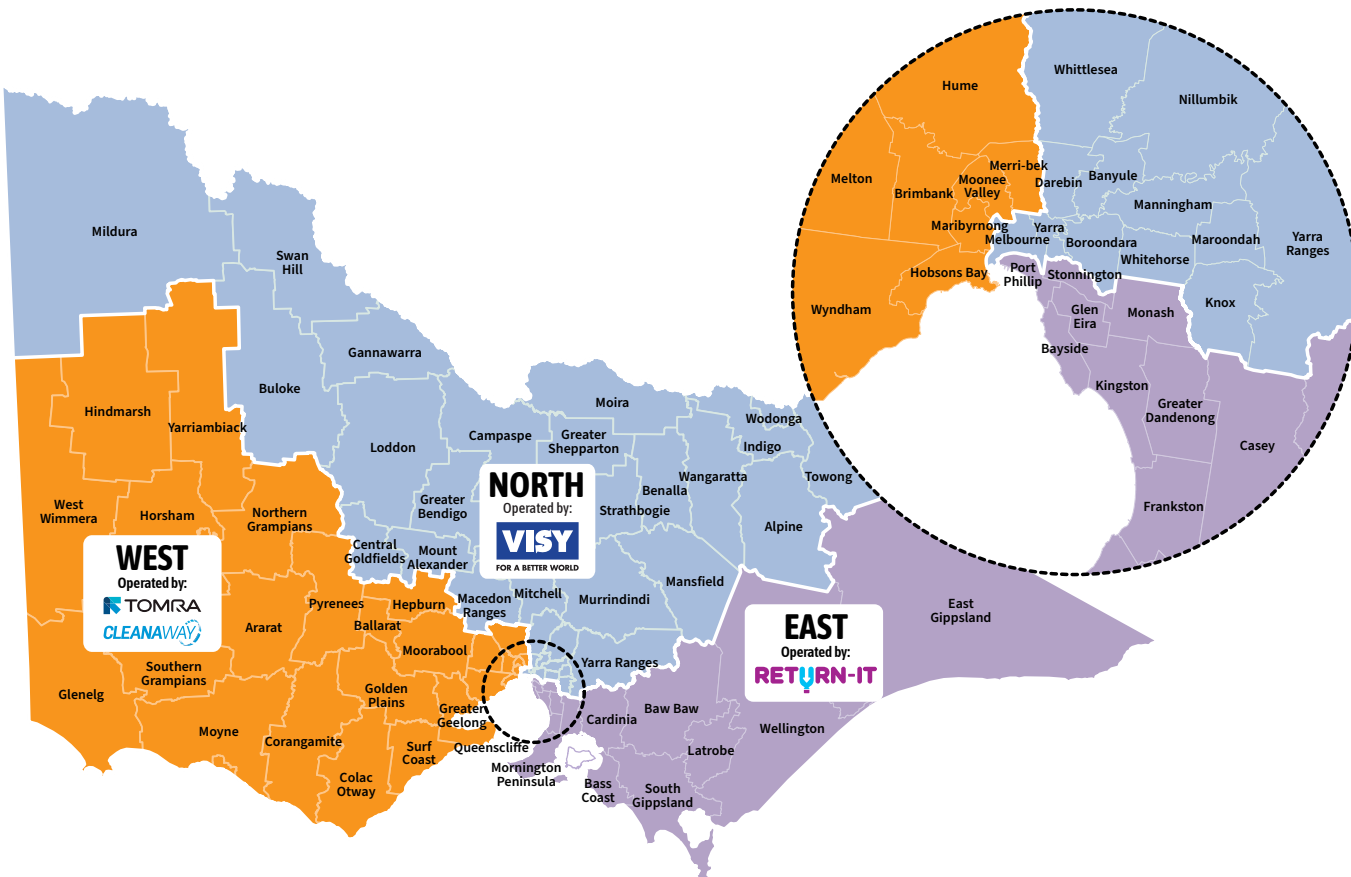

The Scheme’s Victorian Government regulator, Recycling Victoria, is responsible for the regulation, oversight, and administrative direction of CDS Vic. Its statutory role is defined in the Circular Economy (Waste Reduction and Recycling) Act 2021 and Circular Economy (Waste Reduction and Recycling) (Container Deposit Scheme) Regulations 2022 and 2023.

Recycling Victoria’s purpose is to strengthen Victoria’s waste and recycling system. It aims to increase the reliability and transparency of the sector and maximise the ongoing use of products and materials that would otherwise be waste.

Network Operators

VicReturn has partnered with three Network Operators, Visy, Return-It and TOMRA Cleanaway to deliver refund points in specific zones across the State. They also manage:

- refunds to customers and donation partners
- ensuring the proper recycling of containers
- electronic payments and apps
- refund point operations and equipment
- enquiries relating to specific refund points

6. Network Operator CEO messages

Aluminum Bales

North Zone

Tim O'Donnell

General Manager
Visy CDS

Victoria's Container Deposit Scheme has been transformational for recycling in Victoria.

Visy has played a part by establishing over 230 refund points across the Loddon, Mallee, and Hume regions, as well as Melbourne's inner north and eastern suburbs. We have been overwhelmed by the community's positive response. Notably, the enthusiasm from regional Victoria has been a particular point of pride.

Visy is committed to further expanding our network of refund points to enable the community to access the scheme closer to where they live. Building valued partnerships with councils, retailers, property groups and local businesses has enabled us to install over 50 large format Reverse Vending Machines, with another 25 built and ready to be deployed in the coming months.

Our network of Depot and Over-the-Counter refund point operators has delivered social and economic

opportunities for communities, with the creation of jobs and support for local charities.

CDS Vic is helping us recycle and remanufacture more containers returned by Victorians locally. At Laverton we are recycling the glass containers and at Spotswood remanufacturing them back into new bottles and jars. By keeping glass in Victoria we are reducing landfill, growing green collar jobs, and supporting the state's food and beverage sector.

We are proud to have played our part alongside VicReturn, our fellow Network Operators and the Victorian Government to roll out the most accessible scheme in the country - and building on this great foundation in the years to come.

East Zone

Marc Churchin
Chief Executive
Officer
Return-It

As we conclude our first year of operations, it is with a sense of pride and gratitude that I reflect on the remarkable achievements of the Return-It team.

Since the East Zone's integration into the Victorian Container Deposit Scheme, we have witnessed a transformative shift in recycling efforts across our region.

The year has been marked by several key milestones, including the collection of over 230 million containers. This achievement underscores the exceptional level of community involvement that has been pivotal to our success.

Our network of collection points has grown significantly since the scheme's commencement, ensuring that participation is accessible and convenient for thousands of Victorians. Furthermore, our collaboration with local businesses and community organisations has played a crucial role in driving awareness of the multiple benefits of a world class container deposit scheme.

By participating in the scheme, not-for-profit organisations such as the SES, Scouts, Hoxton Group and LaTrobe Valley Enterprises have not only contributed to the circular economy but have generated substantial funds that in turn benefit the communities which they operate within. This symbiotic relationship highlights the multitude of benefits to all Victorians

of scheme participation, creating jobs and livelihoods for individuals and reinforcing the value of collective action in both preserving our environment whilst supporting grassroots organisations.

Looking forward, our vision for the next financial year is ambitious and exciting. We are committed to enhancing the efficiency of our operations and improving the overall customer experience. We plan to continue implementing advanced sorting technologies to enhance our processes and aim to materially increase container redemption rates. Additionally, we will expand our educational outreach programs to deepen public understanding of the many positive benefits of the scheme.

Our accomplishments to date and ambitions for the future reflect our shared dedication to creating a more sustainable environment. Thank you to everyone who has contributed to our success. Together, we will continue to make a meaningful impact and drive positive change in the East Zone of Victoria.

West Zone

James Dorney
Chief Executive Officer
TOMRA Cleanaway

Reflecting on the past year, I am immensely proud of the TOMRA Cleanaway team for their dedication and remarkable agility in launching a new container deposit scheme in the West Zone of Victoria on 1 November 2023.

Our ability to swiftly adapt to a different scheme model and collaborate seamlessly with government, business partners, social enterprise and not-for-profit partners and border zone operators has provided the community with world-class refund collection points to recycle their drink containers for a ten-cent refund per container.

Community response has been extraordinary, with more than 700,000 containers collected on the first day alone across our 140+ collection points. Since the Scheme's inception our network has continued to grow to almost 200 refund points, with over 350 million eligible drink containers being returned across the TOMRA Cleanaway West Zone, resulting in more than \$35 million in refunds back into the hip pockets of local residents.

This Scheme not only benefits the environment but also bolsters the economy and fosters positive social impacts by supplementing incomes, creating fundraising opportunities, and enabling people to support those in need.

Looking ahead, I am confident that TOMRA Cleanaway will continue to deliver positive environmental, economic, and social outcomes, reinforcing our unwavering commitment to sustainability and our communities. Thank you to everyone who has played a part in providing a network of highly automated, accessible and convenient refund collection points for customers to recycle containers. Your dedication and hard work are truly inspiring and wholeheartedly appreciated.

7. FY 23-24 Scheme performance

How is the Scheme funded

Suppliers of eligible drink containers in Victoria are required to pay contributions based on a fixed price per material type (glass, plastic etc) to cover the actual cost of the Scheme, which includes the cost of managing, administering and operating VicReturn.

VicReturn signed up 646 drink suppliers this financial year. Also called First Suppliers, these organisations joined our scheme to ensure the containers they make or manage

are correctly handled throughout their life cycle - from manufacture to the moment they are recycled into new products.

First Suppliers make monthly or quarterly payments to VicReturn as the Scheme Coordinator. Contributions are based on a First Supplier's number of containers supplied into Victoria.

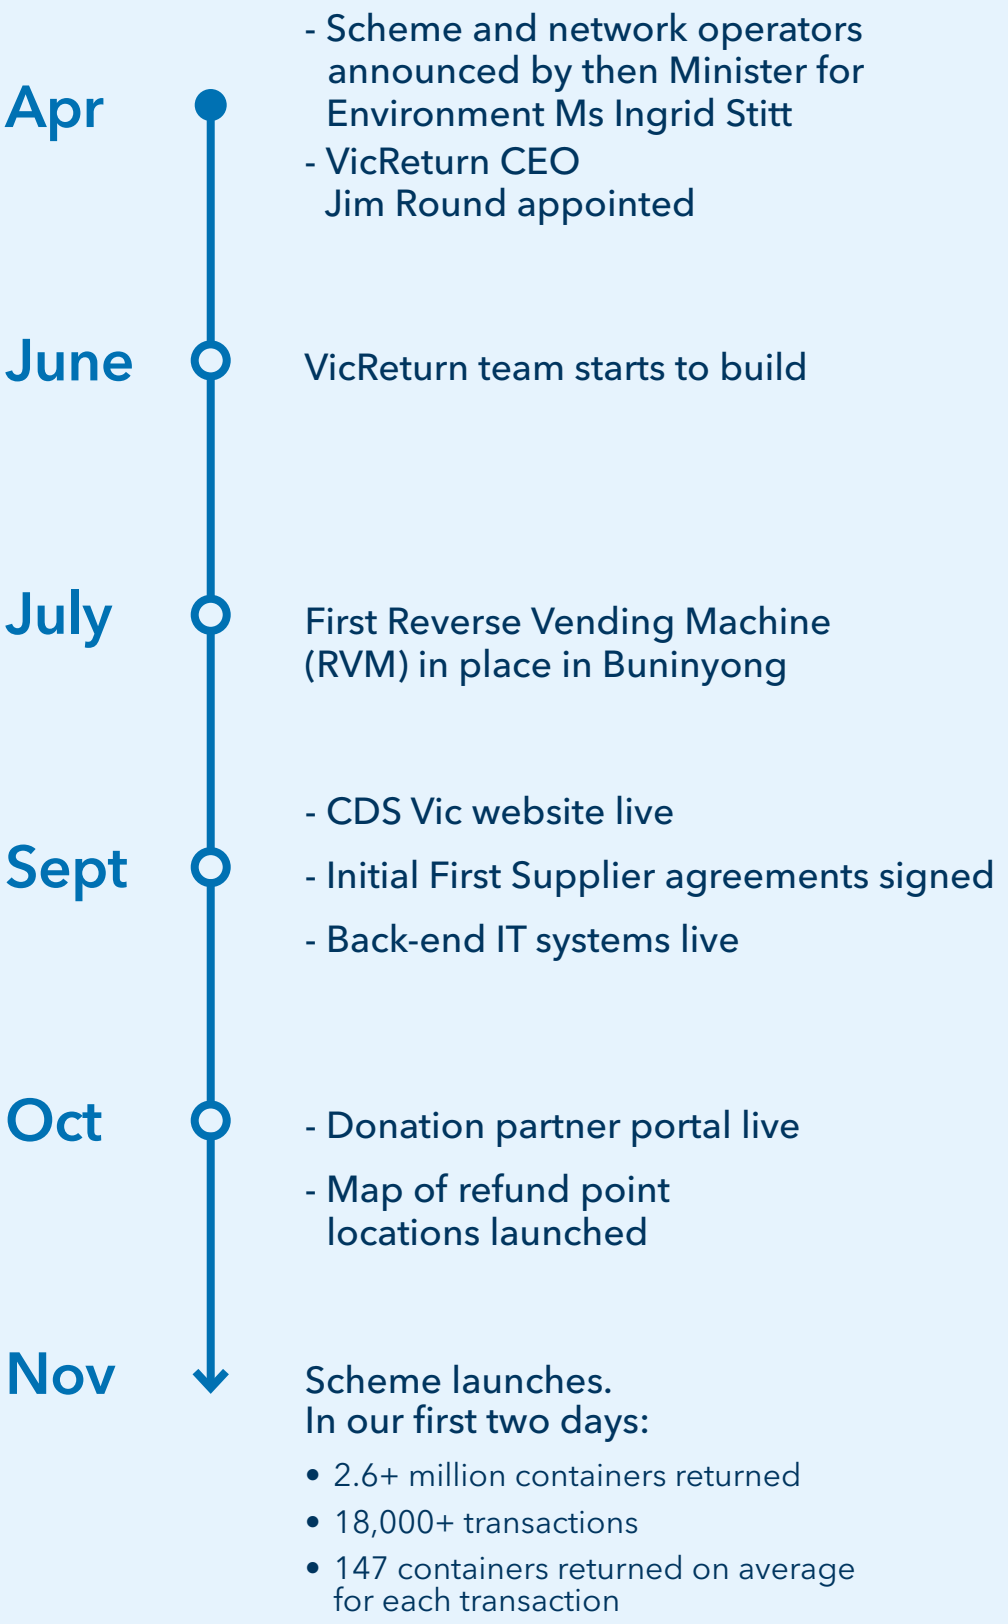

FY 23/24 Scheme performance

Once the Scheme was announced, all partners quickly mobilised to ensure milestones were met and the network was ready for launch. CDS Vic got off to a flying start, with more than 18,000 transactions and 2.6 million containers returned through Network Operators in the first two days of operation in November 2023.

This timeline shows how we went about making sure the Scheme became the fastest-growing in the nation:

Launched with personality

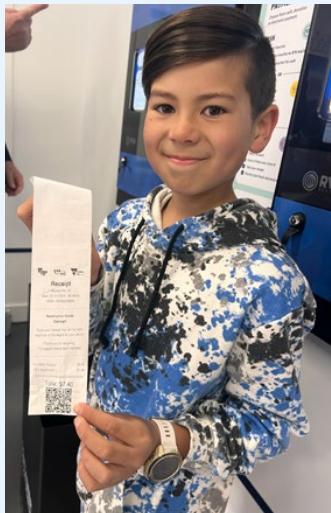

CDS Vic launched across the state on 1 November 2023. The Scheme was officially opened at the Oakleigh Depot (operated by Return-It) by Minister for Environment, Steve Dimopoulos; attended by VicReturn CEO, Jim Round; Recycling Victoria Head, Tony Circelli; TOMRA Cleanaway CEO, James Dorney; Visy CDS GM, Tim O'Donnell; and Return-It CEO, Marc Churchin.

From its outset, the Scheme was strongly supported by community groups from around Victoria, so it was no surprise that so many attended our launch. They included the Mt Waverley Scouts group, Frankston SES, Rotary Clubs from Oakleigh and Mount Martha, and students from Oakleigh's Sacred Heart Girls College.

Key media were also there, highlighting personal stories like that of 10-year-old Ashton Hanson, the first person to return containers in Oakleigh. Ashton had collected 4,700 containers since May, mostly around his local streets in Bentleigh East, and planned to use his refund to buy an air hockey table.

Another standout story on launch day was YouTube content creator, runner and environmentalist, Beau Miles, who camped out overnight before the Drouin depot in Gippsland opened for its first day. Beau, and his sidekick Jimma (Jim Graham), returned 10,000 containers that they had picked up along roadsides during long-distance runs.

Beau grew up on a farm in Drouin West near a rubbish dump and his parents taught him to reuse and recycle anything he found there, from furniture to old ladders.

Beau used the \$1,000 raised from his returns to purchase trees to help rehabilitate roadsides near his home in West Gippsland. Months later they also made a very entertaining video, cataloguing their experiences of collecting and returning a literal truckload of drink containers to CDS Vic.

The video features a cameo by our own VicReturn CEO, Jim Round, who stopped by to congratulate them and help plant trees.

"It's nice to be at the start of something that will be here for a long time and make people respect resources. I did this as a kid and now it's back. I think it's bloody brilliant."

Beau Miles - YouTuber and environmentalist

Jim Graham and Beau Miles

8. Year in review

Southland Shopping Center

Contributing to a circular economy

The Scheme is part of the Victorian Government's \$515 million investment to transform the state's waste and recycling sector. CDS Vic will contribute to Victoria's target of

diverting 80% of all material away from landfill by 2030 and represents a significant milestone in our journey towards a circular economy.

At VicReturn, we are motivated to keep drink containers out of landfill, creating clean streams of recycled materials that help build Victoria’s circular economy. One of the ways we do this is by promoting product stewardship among all first suppliers in Victoria.

Each year about 3 billion beverage containers are sold in Victoria, many of which end up in landfill. Before the introduction of the Scheme, drink containers were the second most littered item in Victoria.

The Scheme is definitely making a difference. Not just to the amount of litter removed but to the mindset of Victorians,

who increasingly realise the value of cleaning up our state and the impact the 10-cent refunds are having to their pockets and their communities. So far, Victorians have enthusiastically embraced the Scheme by making more than 4 million transactions through refund points and diverting 628 million containers from landfill, weighing a total of 30,735 tonnes.

Litter traps on the Yarra River

Victorians embracing the Scheme

Loch Sport Caravan Park in Gippsland rallied its local community to collect containers and help raise funds for Loch Sport Primary school and other good causes. Their local community even lent them a cage trailer to help store the containers. To help everyone stay motivated to continue donating their containers, the Caravan Park regularly posts a picture of the trailer on the community noticeboard with an update on fundraising progress.

Loch Sport Caravan Park

Julie Leach, owner of Chewton’s Service Station, operates as an over-the-counter refund point for CDS Vic. She was overwhelmed with the initial response from her local community when the Scheme launched and continues to be surprised by its exponential growth. Charities/ organisations are selected at random on a fortnightly basis where many customers have chosen to donate their containers and thousands of dollars have been diverted to much needed local causes.

Julie Leach - Chewton

When CDS Vic launched, Debbie from Hampton Park saw an opportunity to pick up litter and use the money to help sick wombats. She was inspired to donate to Mange Management after reading an article about how wombats can get sick with mange, which is fatal if left untreated. Her fundraising has also encouraged other people and local businesses to get involved. “Once people know the money is going to help the wombats, they’re happy to donate their containers,” Debbie said.

Wombat Mange Management

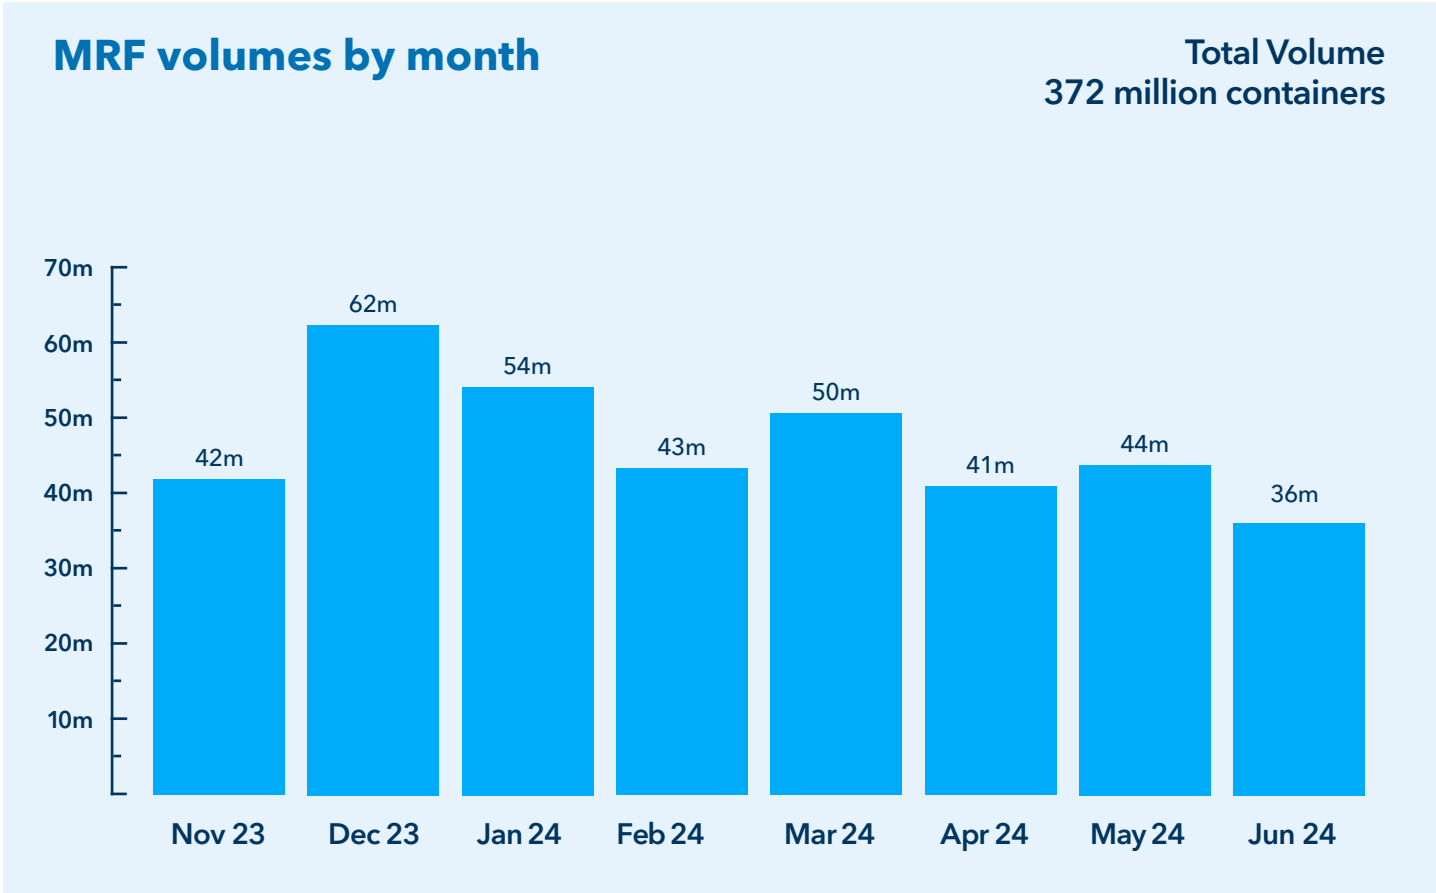

Volume of containers returned each month

Eligible drink containers are returned and recycled via two streams: through refund points and through Material Recovery Facilities (MRFs).

About MRFs

In Victoria, MRFs play an important role in our Scheme. They sort and process council and commercial commingled recyclable material, such as material collected through kerbside yellow bins, for recycling. MRFs perform the important task of sorting and recovering this material to be recycled and are eligible to receive refunds for containers

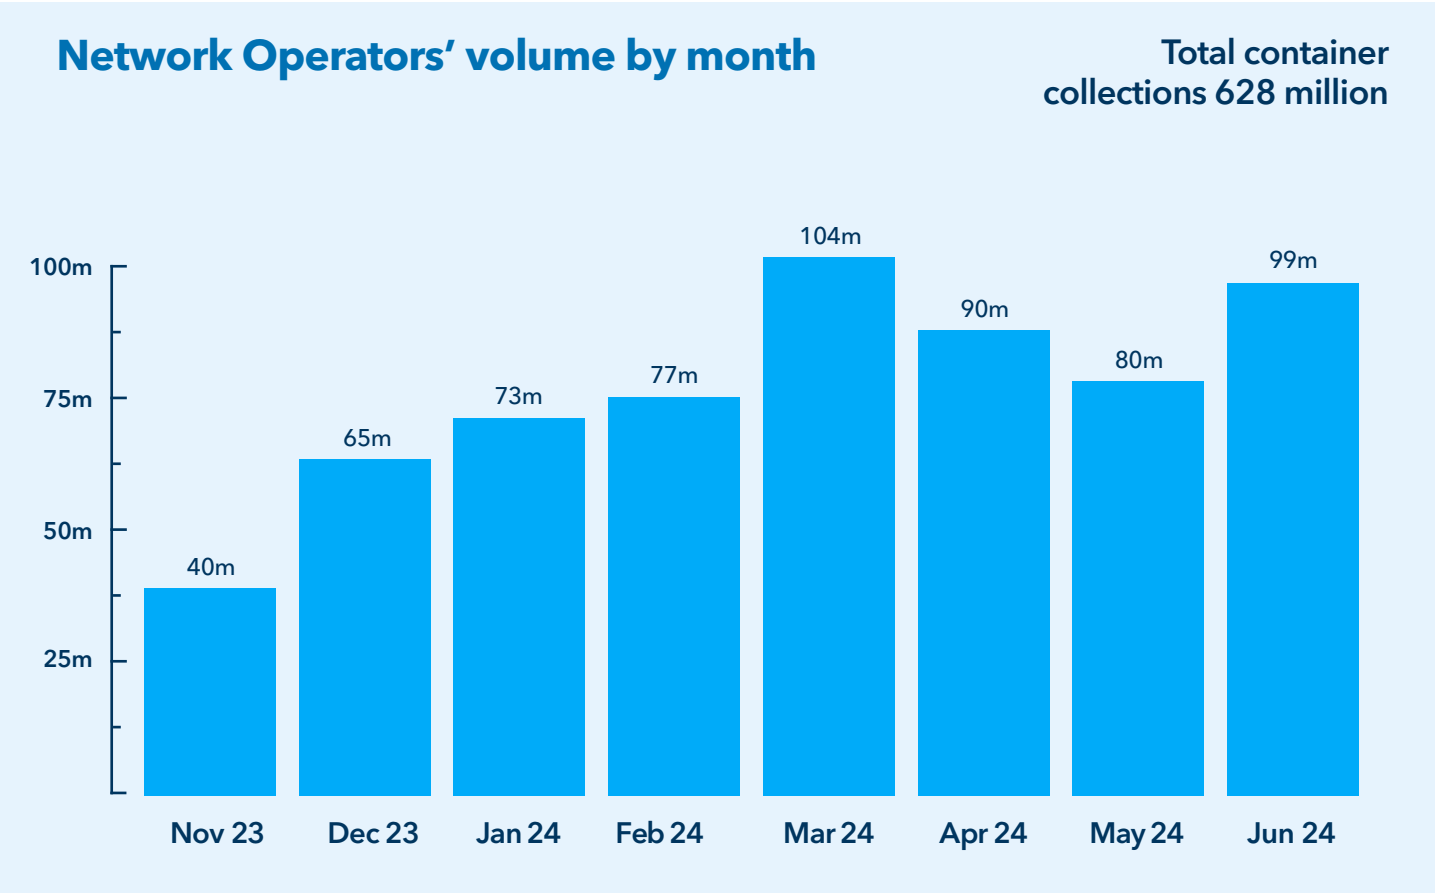

collected as part of the sorting and recovery process. All MRF operators sign a Recovery Agreement with VicReturn to participate in the Scheme.

Network Operators' volume by month

The graph below shows the volume of containers received by our Network Operators which created clean streams of recyclable material. March 2024 was by far our biggest month, with collection quantity peaking at 104 million containers after a flying start in the first two months since launch when return numbers almost

doubled from November 2023 (40 million) to January 2024 (73 million). Overall, growth held steady from March and statewide returns continued consistently above 80 million, concluding the reporting period at 30 June with 99 million containers returned. We look forward to an equally strong year in 2024-25.

Where do the containers go?

Recyclers

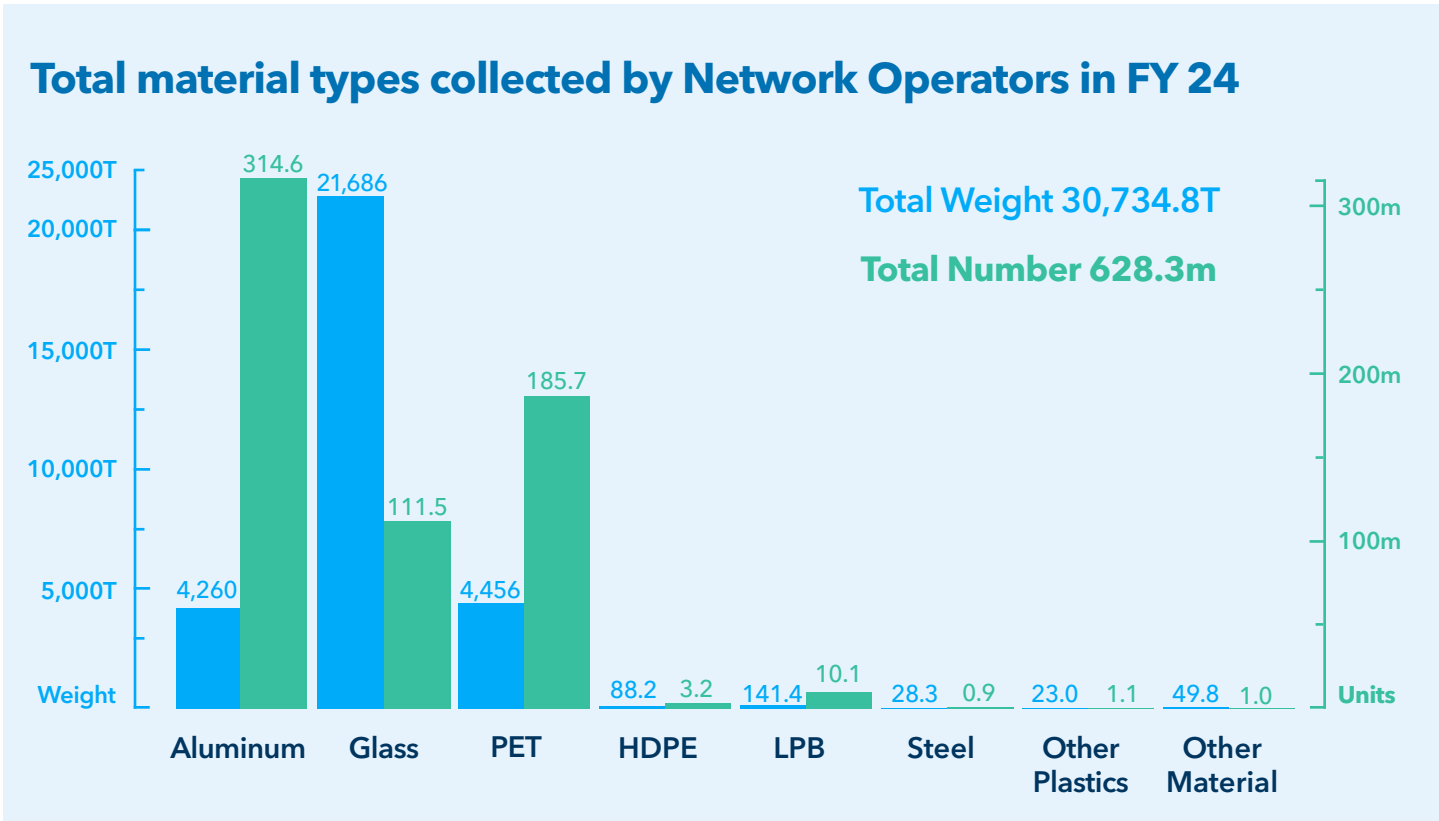

Network Operators and MRFs manage the sale of containers to recyclers. VicReturn has formalised arrangements with the Network Operators and with participating MRFs to manage this process.

The type of material recovered by Network Operators

The most common material recovered through the Scheme was aluminium. Aluminium amounted to more than half of all eligible material, with PET plastic the next closest at 30% – almost twice the amount as glass (18%). Most glass, plastic and aluminium have circular container to container/ high end recycling outcomes.

Network Operators sold a total of 573.5m containers (28,468 tonnes) in FY24 ensuring the proper recycling of our used drink containers.

- 100% of glass was recycled domestically in Victoria and South Australia
- 100% of PET plastic was recycled domestically
- 100% of aluminium was exported and recycled overseas

Accessible and convenient

From the start, we intended the Scheme to be as easy to use and access for as many Victorians as possible. This is why so much effort was put in by so many stakeholders to ensure we had hundreds of refund points live when the Scheme launched.

On 1 Nov 2023 some depots still had paint drying as eager locals dropped off their containers. The number of refund points increased rapidly throughout the year. By the end of June 2024, the network boasted 564 throughout Melbourne and regional Victoria.

Composition of network

North Zone	East Zone	West Zone
		
16 Depots 158 OTCs 38 RVMs	28 Depots 91 OTCs 54 RVMs	13 Depots 38 OTCs 128 RVMs
Total refund points 212	Total refund points 173	Total refund points 179
Avg no of transactions 789,310	Avg no of transactions 1,231,048	Avg no of transactions 2,429,036
No of containers per transaction North Regional 374	No of containers per transaction East Regional 214	No of containers per transaction West Regional 101
No of containers per transaction North Metro 143	No of containers per transaction East Metro 132	No of containers per transaction West Metro 122

Sharing our story

Educating people about the value of CDS Vic is central to VicReturn’s approach to coordinating the Scheme. To achieve this, we delivered a consistent program of communication throughout the year. The first introduction many people had to the Scheme was our distinctive bright orange and blue signage. We capitalised on this recognition to build excitement about the impending launch. Emblazoned with orange and blue, the RVMs, depots and OTCs that started popping up in suburbs and towns functioned as ready-made billboards.

RVM Meadowglen Athletics Track Epping

First impressions

Our launch day was accompanied by an advertising campaign, “Victoria’s Container Deposit Scheme has started. That’s a lot of Change”. The campaign featured a television commercial highlighting the big change happening across the state, with our hero creative presented in out of home advertising, radio, print and online, and translated into Punjabi, Mandarin, Vietnamese and Arabic. We made a big impression in a very short time. In our first eight months, our videos received millions of views and our social media channels grew with thousands of followers.

Throughout the year, we created a series of educational videos to help Victorians of all ages, better understand how the scheme works and its ongoing value. These included videos about our refund points, featuring staff from each zone.

We worked closely with our network operators to support the continuous launches of new refund points in each zone. We rolled out an influencer campaign with key Victorians including Bachar Houli OAM (former Australian Rules footballer), who helped promote the Scheme and encourage participation, making it clear what containers can be returned and where.

We also sponsored Resource Smart Schools ‘Community Leadership School of the Year’ (primary and secondary). This is a free program offered by Sustainability Victoria that supports Victorian schools to embed sustainability across the school facilities, community and curriculum, while saving resources and money for the school.

VicReturn presented the award at the awards ceremony at the MCG. One of the great ‘wins’ was seeing so many schools championing recycling and leading innovative sustainability practices and action on climate change.

Southern Cross Station

Rupam from Return-It explaining how RVMs work.

Teacher and students from St. Patricks Primary School in Port Fairy with Geraldine Hickey and Clancy Wright (VicReturn) at the ResourceSmart Schools Awards 2024.

Ensuring the integrity of our Scheme

One of VicReturn’s key functions is to maintain the integrity of CDS Vic. Fraud, corruption and misconduct have no place within our vision to “create a recycling scheme to keep Victoria beautiful”.

To do this we have established programs to help identify, assess and manage potential risks and controls associated with how the scheme operates.

VicReturn’s risk management and audit functions are critical to the integrity and effectiveness of the scheme. Our programs help identify, assess and manage potential risks and controls associated with scheme operations. They also provide assurance in relation to regulatory and contractual compliance, and overall – achieving the scheme’s goals and objectives.

VicReturn’s Risk Management Framework is aligned to the International Risk Management Standard (ISO31000: 2018). It includes an overarching policy, VicReturn’s risk appetite, strategic and operational risk program, as well as a business continuity and crisis management program.

The Scheme Audit Program works in conjunction with the Risk Management Program to review processes, controls and outputs for the scheme, providing confidence over the completeness, accuracy, existence and timeliness of operational outcomes.

From the 1 November 2023 to 30 June 2024, VicReturn led the delivery of the following scheme operational audits:

- **Refund point inspection audits.** During the year, 432 refund point sites were inspected to ensure they were well maintained and functioned correctly
- **Network Operator audits.** Three operational audits were conducted on network partner processes to validate container deposit volumes at collection points across the network.
- **MRF audits.** Audits were undertaken on 24 claims submitted by registered MRF operators to validate the number of eligible containers processed and claimed through their facilities.
- **Beverage supplier audits.** 15 First Suppliers and Beverage Exporters were audited to validate the accuracy of declared volumes of containers made available for sale in Victoria.

VicReturn also established a Scheme Fraud and Corruption Control Plan to help standardise the approach to preventing, detecting and responding to fraud and corruption activities related to the scheme. These include whistleblowing, investigations, fraud risk assessments, fraud training and fraud detection data analytics. The plan aligns with the Australian Standard: Fraud and Corruption Control 8001-2021.

We are committed to ensuring the integrity of the Scheme.

9. Social benefits

Beau Miles and Jim Round Planting trees in Gippsland

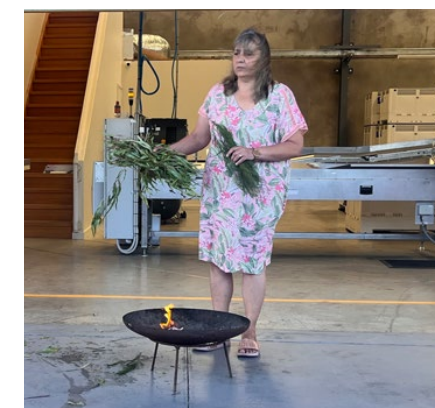

The heart of our Scheme

597 jobs have been created as a direct result of CDS Vic, generating a huge boost to both regional and metro areas with more refund points yet to be launched. A significant percentage of the people employed have been through our refund points many of which operate as social enterprises. Some include:

Latrobe Valley Enterprises (LVE) operates the Morwell Depot in the East Zone. General Manager of Operations, Mark MacManus, said their depot at Morwell has been a remarkable success. It promotes true social inclusion for local people living with disabilities by providing them with employment opportunities. "Our staff are happy to come into work and love having something meaningful to do each week," he said. As a community-based not for profit, LVE has provided meaningful employment and training opportunities for people living with a disability in and around Morwell for 58 years. "It is very exciting to see the increased enthusiasm in the community for the shared goal of reducing waste and helping local people in need," Mark said. "The scheme is a win-win for everyone in the region."

Indigenous-owned recycler, Envirobank, operates seven high-speed depots and pickup services on Wurundjeri Land, Dja Dja Wurrung Land and Taungurung Land in the North Zone. Founder and proud Jagera woman, Narelle Anderson says the scheme illustrates how modern recycling techniques can seamlessly merge with traditional Indigenous knowledge, enhancing environmental sustainability and cultural depth. "Caring for Country transcends environmental conservation; it involves integrating the deep cultural insights of First Nations peoples into our daily operations," she said.

Cooinda in Terang look after the CDS Vic Terang RVM. For 50+ years Cooinda has been providing the communities in Terang and surrounds with services for adults with disabilities and their families. Based on demand in this area, TOMRA Cleanaway installed a second small format reverse vending machine to help meet demand, as the locals are really engaged with the scheme and want to help support Cooinda. The Cooinda participants assist with putting the containers into the machine, keeping the machine clean, and swapping out the bins when required.

Our first statewide donation partner - The Good Friday Appeal

In February 2024, we proudly revealed the Good Friday Appeal as our first statewide donation partner. This iconic, much-loved charity for the Royal Children's Hospital was extremely well supported in each of our zones.

To highlight the relationship, the Good Friday Appeal received priority placement on more than 145 reverse vending machines and promotion at more than 50 depots. People donated in droves, raising an astounding \$64,000 for the Royal Children's Hospital.

"We are thrilled to be partnering with the Victorian Container Deposit Scheme as their first statewide donation partner. Victorians have an innate generosity for helping, and by donating your containers, this is another way to be able to support the community and give to the Good Friday Appeal."

- Good Friday Appeal Executive Director,
Rebecca Cowan

Brothers Sonny and Lenny who raised money for The Good Friday Appeal with Executive Director Rebecca Cowan.

Community engagement

FORMULA 1 AUSTRALIAN GRAND PRIX

VicReturn worked closely with community groups, schools and charities throughout the year to help them learn about, engage with and use the scheme to create change. Our teams embarked on a dedicated 'drive' to spread the social, economic and environmental benefits of the scheme. We did it all - from one-on-one chats with volunteers to engaging patrons at the FORMULA 1 AUSTRALIAN GRAND PRIX 2024.

VicReturn staff and Return-It staff had a big presence at the huge four-day event. For the first time at a major event in Victoria, record crowds of almost 500,000 people were able to recycle their drink containers in dedicated CDS Vic bins. Our stand in the Innovation Hub welcomed nearly 900 visitors who learnt about plastics recycling, explored a reverse vending machine and tested their recycling knowledge on interactive sorting machines.

Excitingly, we discovered many of the school kids who visited told us they were already using CDS Vic to make extra pocket money.

There was also enthusiastic participation in our 'recycling rally' where contestants were challenged to separate CDS Vic eligible containers from mixed kerbside recycling.

Large or small, each event and enterprise helped the Scheme add up to a whole lot more than a tally of impressive numbers. Together, they demonstrate what can be achieved to enrich and empower lives at an individual and community level and throughout the state. We aim to inspire all Victorians to continue supporting them in years to come.

Albert Park 2024

"Having a presence at large events like the Grand Prix helps us to raise public awareness about the importance of recycling."

CEO VicReturn,
Jim Round

Schools

We know children across Victoria have enthusiastically embraced the scheme and schools have been a big driver in their participation.

Kew High School's eco crew of students has been using the Scheme for fundraising. The eco crew showed just how versatile the scheme can be when combined with the resourcefulness of enthusiastic participants. For example, they set up cardboard collection bins on campus and created posters and signs to promote the initiative to fellow students and staff. Once the bins were full, which happened about every week, eco crew members walked their 'haul' to the nearest refund point. The crew also collected drink containers at inter school events like athletics and shared their insights with eco crews at other schools on making the most out of CDS. By 30 June 2024, they had raised more than \$300 to put towards other eco initiatives including compost collection and building worm towers.

Eco Crew from Kew High School

Pay it forward - Victorians donating to charities through CDS Vic

CDS Vic gives charities, community groups and schools the opportunity to raise funds while making an impact.

In the Scheme's first eight months, 4,100+ donation partners were registered and received \$457k from generous refunds.

Every refund point offers options to donate returns to charities, community groups and schools, making it easy for Victorians to support causes that they care about.

It also opens the door for small scale volunteer groups, organisations and schools to use CDS Vic to fund local initiatives, like the Alexandra Football and Netball Club that set up designated container drop-off zones around their northeast Victorian town and delegated its club president to round up used drink containers from residents. The Club's proactive recycling efforts raised thousands of dollars for much-needed sporting equipment.

Most local sports clubs operate on shoe-string budgets, so such a cash injection can be transformational, not to mention add all kinds of indirect social value to their local community.

No surprise that so many charities (including sports, schools and community groups) around the state rushed to register as donation partners.

10. Next year

Can-Do and the CDS Vic tram

Bigger, better, bolder and brighter

At VicReturn, we've learnt a great deal in the first eight months of the Scheme's operation. We conducted research which provided great insights into how the Scheme is performing and what we need to focus on. We know that Victorians are determined to stop their containers going into landfill and are keen to help people in their local communities and around the state.

Next year we will administer CDS Vic to build greater trust in the recycling process, significantly increase participation and continue to operate the scheme with the utmost integrity so Victorians have a system that maximises returns and delivers tangible recycling outcomes.

We have big goals for our next financial year. Around three billion beverages are consumed in Victoria each year and we want to see three billion containers returned and recycled through the scheme. This is our goal, and we are more galvanised than ever to achieve it.

VicReturn Staff, Sarah, Preity, Clancy and Katrina

Directors' report

The directors present their report, together with the financial statements, on the company for the year ended 30 June 2024.

Directors

The following persons were directors of the company during the financial year and up to the date of this report, unless otherwise stated:

Directors	Appointed	Resigned
Freya Marsden	21-Dec-23	
Edward Dowse	28-Jul-20	
Laura Green	28-Feb-23	
Kyle Lethbridge	27-Oct-23	
Mark Mackay	21-Dec-23	
Benjamin Oxley	25-Apr-21	
Philippa Perkins	11-Oct-23	
Lisa Rippon-Lee	29-Jan-24	
Julian Sidebottom	12-Feb-24	
Jeff Maguire	28-Jul-20	29-Jan-24
Julian Sheezel	08-Jun-22	12-Feb-24
Paul Klymenko	05-Feb-21	21-Dec-23
Libby Davidson	25-May-22	11-Oct-23

Alternate Directors

Jeff Maguire	12-Feb-24
(Alternate for Lisa Rippon-Lee)	
Julian Sheezel	29-Jan-24
(Alternate for Julian Sidebottom)	

Principal activities

The principal activity of the Company is to be the Scheme Co-ordinator of Victoria's Container Deposit Scheme (CDS Vic), which commenced on 1st of November 2023. The registered office and principal place of business of the Company is at Level 15, 575 Bourke Street Melbourne VIC 3000.

Objectives

At VicReturn we are motivated to help keep beverage containers out of landfill, creating clean streams of recycled materials that help to build our Circular Economy by promoting product stewardship of all First Suppliers in Victoria.

As the appointed Scheme Co-ordinator for Victoria’s Container Deposit Scheme (CDS Vic), we work with government and our partners to build and operate a large-scale container recycling network, a key step in transforming Victoria’s waste and recycling system. Through a 10c refund for every eligible container returned, we encourage Victorians to collect and recycle their containers, making a positive difference to our people, environment and local industry.

Under the Company’s Constitution, the primary objective of the Company is to administer CDS Vic, which includes:

- ensuring ongoing, efficient and effective arrangements are available in Victoria for empty beverage containers to be collected, sorted and recycled;
- ensuring suppliers of beverage products fund the Scheme by requiring suppliers to pay sufficient amounts under supply arrangements;
- setting the amounts payable, or the method for working out the amounts payable, under the Scheme by suppliers of beverage products to fund the Scheme;
- marketing and promoting the Scheme to ensure public awareness of the Scheme and the location of the container refund points;
- auditing Scheme Participants to ensure the integrity of the Scheme and minimise fraud; and
- otherwise fulfilling the role of Scheme Coordinator, including satisfying any conditions of the appointment as Scheme Coordinator.

In the long term, the Company seeks to achieve positive outcomes for the Victorian community as a whole as a result of administering the Scheme, which include:

- increasing the recovery and recycling of empty beverage containers;
- reducing the number of empty beverage containers that are disposed of as litter or landfill;
- ensuring that beverage suppliers take product stewardship responsibility;
- providing opportunities for social enterprise and benefits for community organisations;
- creating opportunities for employment; and
- complementing existing collection and recycling activities for recyclable waste benefits for community organisations;
- create opportunities for employment; and
- complementing existing collection and recycling activities for recyclable waste.

The Company values are:

- **Sustainability** - We believe that a circular economy can truly transform Victoria’s environment. Through recycling drink containers, we can secure a cleaner ecosystem.
- **Collaboration** - We value the importance of partnerships to achieve the best social, environmental, and commercial results for all.
- **Impact** - We care about what we do and work with purpose and integrity. We’re driven by the opportunity to create positive change for all Victorians.

The Company’s performance is reviewed regularly by the Board against its Strategic Plan and budget.

Review of operations

The Company is an Australia Charities and Not-for-profits (ACNC) registered charity effective 1 July 2023.

The Scheme was launched on 1 November 2023.

The surplus for the Company for the year ended 30 June 2024 amounted to \$19,329,804 (2023: deficit of \$5,105,595).

Contributions on winding up

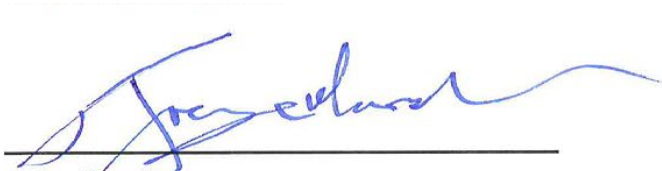

The company is incorporated under the Corporations Act 2001 (Cth) and is a company limited by guarantee. If the company is wound up, each member is required to contribute a maximum of \$10 each towards meeting any outstanding obligations of the company.

Auditor’s independence declaration

A copy of the auditor’s independence declaration as required under section 307C of the Corporations Act 2001 is set out on page 56.

This report is made in accordance with a resolution of Directors, pursuant to section 298(2)(a) of the Corporations Act 2001.

Notes to the financial statements

1. Material accounting policies

The Company is operating as a not-for-profit effective 1 July 2023. The principal accounting policies adopted in the preparation of the financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

New or amended Accounting Standards and Interpretations adopted

The Company has adopted all of the new or amended Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') that are mandatory for the current reporting period. Any new or amended Accounting Standards or Interpretations that are not yet mandatory have not been early adopted.

Basis of preparation

These general purpose financial statements have been prepared in accordance with the Australian Accounting Standards - Simplified Disclosures issued by the Australian Accounting Standards Board ('AASB'), the Australian Charities and Not-for-profits Commission Act 2012 (Cth) and associated regulations and the Corporations Act 2001 (Cth), as appropriate for not-for-profit oriented entities.

Historical cost convention

The financial statements have been prepared under the historical cost convention and on accrual basis. The financial statements are presented in Australian dollars, which is the Company's functional and presentation currency.

Critical accounting estimates

The preparation of the financial statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the company's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in note 2.

Revenue recognition

The company recognises revenue as follows:

Scheme Contributions

The Company as the Scheme Co-ordinator of the Victoria's Container Deposit Scheme (CDS Vic) under the Circular Economy (Waste Reduction and Recycling) Act 2021 ("the Act"), enters into Supply Agreements with eligible First Suppliers to receive contributions to cover the costs of administering the Scheme. Whilst these Agreements represent an enforceable contract, the contributions received from First Suppliers fall under AASB 1058 Income of Not-for-Profit Entities, as there is no sufficiently specific promise specified in the separate Agreements with First Suppliers to be delivered by the Scheme Co-ordinator. Revenue is recognised as the amount owed by relevant suppliers of beverage products under the terms of the Scheme. This is calculated upon the number of eligible containers sold into the Victoria market during the financial year, as defined by the Act.

Finance costs

Finance costs attributable to qualifying assets are capitalised as part of the asset. All other finance costs are expensed in the period in which they are incurred.

Current and non-current classification

Assets and liabilities are presented in the statement of financial position based on current and non-current classification.

An asset is classified as current when: it is either expected to be realised or intended to be sold or consumed in the company's normal operating cycle; it is held primarily for the purpose of trading; it is expected to be realised within 12 months after the reporting period; or the asset is cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period. All other assets are classified as non-current.

Notes to the financial statements

A liability is classified as current when: it is either expected to be settled in the company’s normal operating cycle; it is held primarily for the purpose of trading; it is due to be settled within 12 months after the reporting period; or there is no unconditional right to defer the settlement of the liability for at least 12 months after the reporting period. All other liabilities are classified as non-current.

Cash and cash equivalents

Cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

Trade and other receivables

Trade receivables are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method, less any allowance for expected credit losses. Trade receivables are due for settlement within 5 business days.

The Company has applied the simplified approach to measuring expected credit losses, which uses a lifetime expected loss allowance. To measure the expected credit losses, trade receivables have been grouped based on days overdue.

Other receivables are recognised at amortised cost, less any allowance for expected credit losses.

Trade and other payables

These amounts represent liabilities for goods and services provided to the Company prior to the end of the financial year and which are unpaid. Due to their short-term nature they are measured at amortised cost and are not discounted. The amounts are unsecured and are usually paid within 30 days of recognition.

Fair value measurement

When an asset or liability, financial or non-

financial, is measured at fair value for recognition or disclosure purposes, the fair value is based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date; and assumes that the transaction will take place either: in the principal market; or in the absence of a principal market, in the most advantageous market.

Fair value is measured using the assumptions that market participants would use when pricing the asset or liability, assuming they act in their economic best interests. For non-financial assets, the fair value measurement is based on its highest and best use. Valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, are used, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

Borrowings

Loans and borrowing are initially recognized at the fair value of the consideration received, net of transaction costs. They are subsequently measured at amortised cost using the effective interest method.

Leases

At inception of a contract, the company assesses whether a contract is, or contains, a lease based on whether the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The cost of right-of-use assets is comprised of the initial measurement of the liability, any lease payments pre-commencement date, offset by any lease incentives received, initial direct costs and restoration costs, if applicable. The cost is depreciated over the shorter of the asset’s useful life and the life of the lease on a straight line basis. The Company maintains an office lease with a 5 year term. Lease liabilities are measured by the net present value of fixed payments, offset by any

Notes to the financial statements

lease incentives receivable; variable lease payments linked to an index or rate if applicable; the exercise price of a purchase option when the exercise of the option is reasonably certain to occur; and payment of penalties for terminating the lease (where the life of the lease has assumed termination). Payments made are allocated between lease liability and finance cost, with the finance cost charged to interest expense over the life of the lease. The weighted average incremental borrowing rate was applied to the lease liabilities. The lease liability is measured at amortised cost using the effective interest method.

Goods and Services Tax (‘GST’) and other similar taxes

Revenues, expenses and assets are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the tax authority. In this case it is recognised as part of the cost of the acquisition of the asset or as part of the expense.

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the tax authority is included in other receivables or other payables in the statement of financial position.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to the tax authority, are presented as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the tax authority.

2. Critical accounting judgements, estimates and assumptions

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts in the financial statements. Management continually evaluates its judgements and estimates in relation

to assets, liabilities, contingent liabilities, revenue and expenses. Management bases its judgements, estimates and assumptions on historical experience and on other various factors, including expectations of future events, management believes to be reasonable under the circumstances. The resulting accounting judgements and estimates will seldom equal the related actual results. The judgements, estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities (refer to the respective notes) within the next financial year is discussed below.

Accrued expenses and income

Recognised amounts of direct Scheme costs and revenue, and related accrued expenses and revenue reflect management’s best estimate of amounts owing to/from Scheme Participants that were not wholly substantiated by declarations of Scheme Participants at year end. These estimates are based on a number of critical underlying assumptions such as the volumes of containers submitted and processed through the Scheme at a given time. Estimation uncertainties exist with regard to these items and variations in these assumptions may significantly impact the amount of direct scheme costs and revenue, and accrued expenses and revenue.

Going Concern

As at 30 June 2024, the company had net assets of \$14,178,027 (2023: net deficiency of \$5,151,777). The financial statements have been prepared on a going concern basis, which assumes that the Company will be able to continue trading, realise its assets and discharge its liabilities in the ordinary course of business for a period of at least 12 months from the date that these financial statements are approved.

VicReturn, the appointed Scheme Co-ordinator for CDS Vic, launched the scheme on 1 November 2023. The ongoing Scheme Contributions made by the First Suppliers under their statutory obligations will continue to be sufficient to cover operating costs of the Scheme and fees of the Company.

Notes to the financial statements

3. Income

	2024 \$	2023 \$
Scheme Contributions	220,422,444	-

	743,116	-

Reconciliations

Reconciliations at the beginning and end of the current financial year for the office lease are set out below:

	Office lease Total \$
At 01 July 2023	-
Addition	825,684
Depreciation expense	(82,568)
At 30 June 2024	743,116

Notes to the financial statements

9. Trade and other payables

	2024 \$	2023 \$
Trade payables	6,014,359	24,695
Accrued scheme expenses	28,840,676	-
Other payables	2,947,153	3,983,059
	37,802,188	4,007,754

10. Borrowings

	2024 \$	2023 \$
Current	3,765,501	2,375,671
Non-current	14,580,668	6,766,107
	18,346,169	9,141,778

In order to establish and operationalise the Scheme, the members of the Company, Coca-Cola Europacific Partners Australia Pty Ltd, Lion Pty Ltd and Asahi Holdings (Australia) Pty Ltd provided two loan facilities totalling \$12m. This facility agreement was executed on 27 October 2021 and was drawn down by the Company prior to the Scheme commencement.

In addition, the Company entered into an additional facility agreement (Scheme working capital) with the Treasury Corporation of Victoria (TCV) on 28 July 2023. The facility agreement consisted of an interest bearing facility totalling \$60m.

Key terms of the loans to VicReturn are as follows:

Facility	Term	Interest	Maximum Drawdown	Drawdown at 30-Jun-24
Loan Facility A	3 years	6.50%	10,950,000	8,786,169
Loan Facility B	7 years	8.00%	1,050,000	1,050,000
			12,000,000	9,836,169
TCV Loan	2 years	Variable	60,000,000	8,510,000

Notes to the financial statements

Notes to the financial statements

15. Related party transactions

(a) Key management personnel

Compensation
The aggregate compensation made to directors and other members of key management personnel of the company is set out below:

	2024 \$	2023 \$
Key Management Personnel	398,856	99,072

(b) Loans to/from related parties

There were no loans to or from related parties at the current and previous reporting date.

(c) Transactions with other related parties

There were no trade receivable from or trade payables to related parties at the current and previous reporting date.

17. Events after the reporting period

No matter or circumstance has arisen since 30 June 2024 that has significantly affected, or may significantly affect the Company's operations, the results of those operations, or the Company's state of affairs in future financial years.

Directors' declaration

In the directors' opinion:

- the attached financial statements and notes comply with the Corporations Act 2001, the Australian Accounting Standards - Simplified Disclosures, the Australian Charities and Not-for-profits Commission Act 2012 (Cth) and other mandatory professional reporting requirements;
- The financial statements and notes for VicReturn Limited are in accordance with the Australian Charities and Not-for-profits Commission Act 2012 (Cth), including:
 - giving a true and fair view of its financial position as at 30 June 2024 and of its performance for the financial year ended on that date;
 - complying with Australian Accounting Standards - Simplified Disclosures (including the Australian Accounting Interpretations) and the Australian Charities and Not-for-Profits Commission Regulation 2022 (Cth); and
 - there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.

This report is made in accordance with a resolution of the Directors.

On behalf of the directors

Independent Auditor's Report

To the Members of VicReturn Ltd

Report on the audit of the financial report

Opinion

We have audited the financial report of VicReturn Ltd (the "Company"), which comprises the statement of financial position as at 30 June 2024, and the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including material accounting policy information and the Directors' declaration.

In our opinion, the financial report of VicReturn Ltd has been prepared in accordance with Division 60 of the *Australian Charities and Not-for-profits Commission Act 2012*, including:

- giving a true and fair view of the Company's financial position as at 30 June 2024 and of its financial performance for the year then ended; and
- complying with Australian Accounting Standards *AASB 1060 General Purpose Financial Statements - Simplified Disclosures for For-Profit and Not-for-Profit Tier 2 Entities* and Division 60 of the *Australian Charities and Not-for-profits Commission Regulation 2022*.

Basis for opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the Company in accordance with the ethical requirements of the Accounting Professional and Ethical Standards Board's *APES 110 Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

www.grantthornton.com.au
ACN-130 913 594

Grant Thornton Audit Pty Ltd ACN 130 913 594 a subsidiary or related entity of Grant Thornton Australia Limited ABN 41 127 556 389 ACN 127 556 389. 'Grant Thornton' refers to the brand under which the Grant Thornton member firms provide assurance, tax and advisory services to their clients and/or refers to one or more member firms, as the context requires. Grant Thornton Australia Limited is a member firm of Grant Thornton International Ltd (GTIL). GTIL and the member firms are not a worldwide partnership. GTIL and each member firm is a separate legal entity. Services are delivered by the member firms. GTIL does not provide services to clients. GTIL and its member firms are not agents of, and do not obligate one another and are not liable for one another's acts or omissions. In the Australian context only, the use of the term 'Grant Thornton' may refer to Grant Thornton Australia Limited ABN 41 127 556 389 ACN 127 556 389 and its Australian subsidiaries and related entities. Liability limited by a scheme approved under Professional Standards Legislation.

Responsibilities of the Directors for the financial report

The Directors of the Company are responsible for the preparation and fair presentation of the financial report in accordance with Australian Accounting Standards – *AASB 1060 General Purpose Financial Statements - Simplified Disclosures for For-Profit and Not-for-Profit Tier 2 Entities* and the ACNC Act, and for such internal control as the Directors determine is necessary to enable the preparation of the financial report that is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

The Directors are responsible for overseeing the Company's financial reporting process.

Auditor's responsibilities for the audit of the financial report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

As part of an audit in accordance with the Australian Auditing Standards, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.
- Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial report or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial report, including the disclosures, and whether the financial report represents the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
